

# Power Pack - Power at your Feet!

The Analog Alien Power Pack is a simple, yet versatile, clean boost. The Power Pack's buffered input and unique gain stage make it the perfect choice to boost your amp's input stage, as well as maintain unity gain and tonal balance throughout your signal path.

## Standard settings for use:

**Restoring Unity Gain:** Set Gain from far left to 9:00

**Amp Boosting :** Gain between 10:00 and full right.

## Setting tip:

The key to using the Power Pack efficiently is to use your ears. Where to set the gain control on the Power Pack depends on the design of your amplifier's circuit and the amount of boost you are trying to achieve. The Power Pack is a clean boost - not a distortion/overdrive pedal. Distortion and overdrive are produced by using the Power Pack to boost your guitar amplifier's input. This, in turn, enables the amplifier to produce the desired amount of distortion and/or overdrive on its own.

If your preference is to use smaller vintage tube amps, you may have experienced a situation where you wished you could get more output from them. Inside many of these smaller amps is a much larger amp waiting to get out and be heard. If your vintage amp is maxed out at 10 and you wish it could go to 12, then the Power Pack is your ticket to ride.

The Power Pack is also perfect to restore unity gain to your signal, or to improve the sound and performance of the other pedals in your signal chain. Try experimenting by placing the Power Pack at the beginning or at the end of your signal path and adjust the gain control until the desired output level is achieved.

## Specs:

True Bypass.

100% analog circuitry.

Buffered Input

Works with Guitar, Bass and several other amplified instruments.

Interfaces well with other pedals while improving their tone and performance.

## Power:

9v+ battery or standard 9v+ power supply (BOSS PAS-120S recommended).

Pin negative ( - ) Barrel positive ( + )

## Current Draw:

Pedal off - 4.74mA

Pedal on - 5.39mA

## Packaging:

Each Power Pack comes wrapped in a Black Velvet sack and ships in a white Indestructo box with instruction sheet and Analog Alien Sticker.
