

POWER PACK!

Whether you're looking to boost your amp, enhance the sound quality of your effects pedals, or restore unity gain to your signal path, the Analog Alien Power Pack is the perfect choice to do it all.

The Analog Alien Power Pack is a simple, yet powerful and versatile clean boost.

The Power Pack's buffered input and unique gain stage make it the perfect choice to boost your amp's input stage, as well as maintain unity gain and tonal balance throughout your signal path. If you use pedals, especially older vintage pedals, you may be experiencing a loss in signal level whenever one or more of them are in use. The Power Pack will restore your signal to unity gain, and at the same time improve the sound quality of your pedals. The Power Pack is designed to work with both guitar and bass.

It's our goal at Analog Alien to make the best sounding effects pedals on the planet.

We accomplish this in a straightforward manner...we make pedals that we would like to use ourselves, and we pay close attention to every detail of their construction.

Analog Alien®

TIPS FOR USE

The key to using the Power Pack efficiently is to use your ears. Where to set the gain control on the Power Pack depends on the design of your amplifier's circuit and the amount of boost you are trying to achieve. The Power Pack is a clean boost; it is NOT a distortion or overdrive pedal. Distortion and overdrive are produced by using the Power Pack to boost your guitar amplifier's input. This, in turn, enables the amplifier to produce the desired amount of distortion and/or overdrive on its own.

If your preference is to use smaller vintage tube amps, you may have experienced a situation where you wished you could get more output from them. Inside many of these smaller amps is a much larger amp waiting to get out and be heard. If your vintage amp is maxed out at 10, and you wish it could go to 12, then the Power Pack is your ticket to ride.

The Power Pack is also perfect to restore unity gain to your signal, or to improve the sound and performance of the other pedals in your signal chain. Try experimenting by placing the Power Pack at the beginning or at the end of your signal path and adjust the gain control until the desired output level is achieved.

STANDARD SETTINGS FOR USE:

Restoring Unity Gain: Set Gain from far left to 9:00

Amp Boosting: Gain between 10:00 and full right.

SPECS

True Bypass

100% Analog Circuitry

Plays Nicely With Other Pedals

POWER 9v+ battery or standard 9v+ power supply
(1 SPOT NW1-US recommended)

Pin negative (-) Barrel positive (+)

CURRENT DRAW

Pedal Off - 4.74mA

Pedal On - 5.39mA

PACKAGING

- 1 Black Velvet Carrying Pouch
- 1 Indestructo Box
- 1 Instruction Sheet
- 1 Analog Alien Sticker

WARRANTY: Analog Alien warrantees the pedal for one year under normal use to the original owner. To activate your warranty, please email us at: analogalien@gmail.com. Include your name, pedal serial number, and name of the dealer where purchased.

BATTERY

The Power Pack is powered by a 9v battery.

When you are not using the pedal, unplug your guitar's cable from the input of the pedal to prevent the battery from draining.

AC ADAPTER: IMPORTANT!

If you power the Power Pack with an AC adapter, we recommend the 1 SPOT NW1-US. If you use a different AC adapter and cause damage to the unit, you will void the warranty.

RETURN POLICY

You have 48 hours to check out the Power Pack. If it's not for you, simply email us for our return information. There are no "restocking fees," but shipping and handling charges are non-refundable. The pedal and packaging must be returned to us in the same condition as when you first received it. So, please be sure to handle it carefully.
